## LESCO PROFESSIONAL LANDSCAPE AND ORNAMENTAL ALL-PURPOSE FERTILIZER

Contains LESCO® Poly Plus® Polymer Coated Urea to provide a uniform growth with extended nitrogen feeding.

LESCO 14-14-14 Professional Landscape and Ornamental All-Purpose Fertilizer is a product specifically formulated for use on trees, shrubs, and flowering plants. This fertilizer works best in any soil that requires a high potassium fertilizer for proper plant growth. The sources of nitrogen, phosphorus, and potassium have been sulfur coated to provide a longer release than uncoated, quick release fertilizers. Normal feeding from this product will last for 3 to 4 months.

Apply LESCO 14-14-14 Professional Landscape and Ornamental All-Purpose Fertilizer at the rate of 3½ to 7 pounds of fertilizer per 1,000 sq ft (50' x 20') to flower beds and planting areas. Use a LESCO rotary spreader, chest spreader, or hand application method to apply the fertilizer. Apply two times per year or as needed to maintain plant growth. For new plantings, the fertilizer may be incorporated into the soil prior to planting or applied to the top of the soil around the plants after planting.

For trees and larger shrubs, apply ½ to 1 pound of this fertilizer per inch of trunk diameter. Spread evenly on the ground around the plant from the outer edge of the leaves inward to the trunk. Apply two times per year, in the spring and in late fall.

Apply the fertilizer to dry foliage and water in soon after application for the best results. Sweep off walks and painted surfaces following application to avoid discoloration.
