For fertilization and general insect control in turfgrass areas including athletic fields and parks and residential, commercial, industrial, institutional, and recreational lawns.

Not for use on golf courses or sod farms.

For control of grubs, treats up to 13,613 sq. ft. For control of surface feeders, treats up to 27,225 sq. ft.

**ACTIVE INGREDIENT:**
- Imidacloprid, 1-[(6-Chloro-3-pyridinyl) methyl]-N-nitro-2-imidazolidinimine: 0.125%
- Bifenthrin: 0.100%

**OTHER INGREDIENTS:**
- 99.775%
- 82757-MA-002 (H)
- EPA Reg. No. 432-1417-10404

**F1560**

**FIRST AID**

If on skin:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of emergency call toll free the Bayer Environmental Science Emergency Response Telephone No. 1-800-334-7577.

Note to Physician:
- No specific antidote is available. Treat the patient symptomatically. This product contains a pyrethroid. If large amounts have been ingested, milk, cream and other digestible fats and oils may increase absorption and so should be avoided.

---

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:** Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to fish and aquatic invertebrates. Do not apply directly to water, to or on areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Run-off may be hazardous to aquatic organisms in water adjacent to treated areas.

This product contains a chemical with properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Do not formulate this product into other end-use products.

**APPLICATION TO TURFGRASS**

The use of this product will provide plant nutrients as well as providing control of selected insect pests. LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer have sufficient residual activity so that applications for control of subsurface feeders can be made preceding the egg laying activity. The need for an application for control of subsurface feeders can be based on historical monitoring of the site, previous records or experiences, current season adult trapping or other methods. Optimum control of subsurface feeders will be achieved when applications are made prior to egg hatch of the target pest, followed by sufficient irrigation or rainfall to move the active ingredient through the thatch.

The active ingredients LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer have sufficient knockdown and residual activity to provide remedial and residual control of surface feeding pests. Applications for control of surface feeding pests can be made when infestations are anticipated based on historical monitoring of the site, previous records or experience, current season adult trapping or presence of insects at economic thresholds as determined by scouting and/or recommendations of local State extension personnel or other qualified specialists.

Do not apply more than 200 lbs. of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer (0.25 lbs. of imidacloprid, 0.2 lbs. bifenthrin) per acre per application on residential use sites (i.e., around private homes, apartment buildings, condominiums, non-agricultural outbuildings, non-commercial greenhouses, pre-schools or day care facilities). May be applied at up to 400 lbs. of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer (0.5 lbs. of imidacloprid, 0.4 lbs. bifenthrin) per application on non-residential use sites (i.e., around institutional, public, commercial or industrial buildings; parks; recreational areas or athletic fields).

Do not apply when turfgrass areas are waterlogged or the soil is saturated with water. Adequate distribution of the active ingredient cannot be achieved when these conditions exist. The treated turf must be in such a condition that the rainfall or irrigation will penetrate vertically in the soil profile. Total amount applied cannot exceed 400 lbs. (0.5 lbs. of imidacloprid, 0.4 lbs. of bifenthrin) per acre per year.

**NOTE:** Not for use in commercial greenhouses or on grass grown for seed or on golf courses and sod farms. For use on plants intended for aesthetic purposes or climatic modification and being grown in indoor plantscapes, ornamental gardens or parks, or on lawns and grounds.

**APPLICATION EQUIPMENT**

Apply LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer uniformly over the area being treated with normally used granular application equipment. Both drop-type and rotary-type spreaders may be used to apply LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer. Avoid the use of spreaders that apply the material in narrow, concentrated bands. Calibrate application equipment prior to use according to the manufacturer’s directions. Check frequently to be sure equipment is working properly and distributing granules uniformly and accurately.

### DOSAGE

**LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer**

- **Suitable for use in nurseries or commercial greenhouses.**
- **IMPORTANT: READ BEFORE USE**

#### RESTRICTIONS

- Avoid run-off or puddling of impure irrigation application. Avoid application of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer to areas that are waterlogged or saturated at the time of application.
- Avoid application of LESCO ALLECTUS 0.225 Insecticide Plus Fertilizer to areas that are waterlogged or saturated at the time of application. Avoid application to areas that are waterlogged or saturated at the time of application.
- **For crops not listed on any imidacloprid and a bifenthrin label, or for crops for which no interval must be observed.**
